

## TDrEcovery User's Guide

The TDrEcovery is a unique accessory that can back up and recover the TD1000, TD2000 and TD3000 phone systems on a USB Disk-on-Key (DOK). It enables simple, safe and speedy recovery of the Telco Depot TD phone system solutions, including configuration files, voice prompts voicemails and more.

### Instructions

1. Connect a monitor and keyboard to the TD phone system.
2. Power on the system and hold down the F2 key. The BIOS setup screen will appear.
3. From BIOS setup choose:
  - a. Legacy USB support: Enable
  - b. USB boot: Enable
  - c. Boot USB Devices First: Enable
4. Plug the TDrEcovery USB key to the USB port of your system.
5. Power up the system. The system will boot from the USB key and will show the screen below

6. Select the first option or just wait (after 5 seconds the system will start to load the TDrEcovery software).

7. Make your selection from the following screen

8. To create a backup:
  - a. Select the "Backup" option.
  - b. Give your backup a distinctive name.
  - c. The Backup process will start and within minutes, it will be completed.
  - d. power down the system, remove the USB key and reboot your TD system.
  - e. You may then connect the USB key to ANY PC and copy the file that was just created for added security.
9. To Restore your system from a backup:
  - a. Select the "Restore" option.
  - b. Select the appropriate backup file.
  - c. The Restore process will start and within minutes, it will be completed.
  - d. power down the system, remove the USB key and reboot your TD system.
  - e. Your TD system is now restored to it's previous condition and is ready for action.
